

**A  
Project Report  
On  
“ Scraping Job Postings ”**

**By Divyansh Sharma**

## Table of Contents

Problem Statement.....	3
Pre-requirements.....	4
Project Code .....	5
Sample Output: .....	8
Sample Output – 1: .....	8
Sample Output – 2: .....	10

## **Problem Statement**

1. **Objective:** Write a Python script to scrape job postings from a job website (e.g., Indeed, Glassdoor) for a specific keyword.
2. **Instructions:**
  - Use requests to access the job listing page with the specified keyword (e.g., "Python Developer").
  - Use BeautifulSoup to parse the page and extract job titles, company names, locations, and brief descriptions.
  - Display the extracted information in a structured format (e.g., table).
  - Save the scraped job postings to a CSV file.

## Pre-requirements

1. Install python in your computer
2. Run the following commands in the shell:
  - a. Pip install pandas
  - b. Pip install bs4
  - c. Pip install requests
  - d. Pip install html5lib
3. Run the script in shell as: **Python Project.py**
4. Enter the desired inputs
5. The job postings will be saved to a CSV file named shine\_job.csv

## Project Code

```
Project.py X
Project.py > ...
1 import pandas as pd
2 import requests
3 from bs4 import BeautifulSoup
4
5 # Base URL for the Shine job search site
6 base_url = "https://www.shine.com"
7
8 def find_job_postings(job_title, loc, exp, pages):
9     # Format the job title and location for URL compatibility
10    job_title = job_title.lower().replace(" ", "-")
11    loc = loc.lower().replace(" ", "-")
12
13    job_postings = []
14
15    for page in range(1, pages + 1):
16        url = f"{base_url}/job-search/{job_title}-jobs-in-{loc}-{page}?q={job_title}&loc={loc}&minexp={exp}"
17        try:
18            response = requests.get(url)
19            response.raise_for_status() # Raise an error if the request failed
20            soup = BeautifulSoup(response.text, "html.parser")
21            print(f"Processing page {page}...")
22
23            # Find all job cards on the page
24            job_cards = soup.find_all("div", class_="jobCard")
25            for job_card in job_cards:
26                try:
27                    job_url = base_url + job_card.find("a")["href"]
28                    job_response = requests.get(job_url)
29                    job_response.raise_for_status()
30
31                    job_soup = BeautifulSoup(job_response.text, "html.parser")
32
33                    # Extract job details
34                    title = job_soup.find("h1", class_="font-size-24").text.strip()
35                    company = job_soup.find("div",
36                                            class_="JobDetailWidget_jobCard_cName__qvsw").text.strip()

Jr. Engineer	BridgeLabz Solutions Private Limited,	1 to 2 Yrs	mem , proofs of concept , .net full stack , python data engineering , ai	Bangalore	Are you looking to get into a software development role but have not been successful in getting Job offers Then this is a great opportunity for you We are looking for bright candidates who may not have any significant or relevant software development experience but are looking to make a shift to development roles. Job role: Jr. Engineer Eligibility: B.E./B.Tech graduate from any branch of engineering Experience: 1+ year experience Salary: 4-5 LPA Job Location: Bangalore and willing to go to Chennai/Chandigarh/Bhopal for assignment Role Expectations: Develop Real-World Solutions: Be hands-on in developing impactful applications and platforms that us and our clients, bringing real-world tech innovations to life. Advance Cutting-Edge Projects: Work on challenging projects that give you exposure to the latest in tech and an opportunity to grow in a fast-evolving industry. People management and Mentoring : Mentor young budding engineers in deep tech (Java/ Net Full Stack, MEAN/MERN, Python Data Engineering, AI, etc) for Software Development roles using our innovative methodology. Innovate and Explore: Lead the charge in exploring emerging technologies, from Java/ Net Full Stack to MEAN/MERN, Python Data Engineering, and AI, by developing Proofs of Concept (PoCs) that demonstrate potential applications and advancements. Don't miss this chance to start your IT career!
Software Engineer Fresher	Karnataka Information Solution	0 to 4 Yrs	.net , hibernate , python , html , css , web designing , asp.net , jquery , java , javascript	Bangalore	Job Description: We are hiring for Freshers. Java , .Net, Android, Web Developer Qualification : B.Tech / B.E / M.C.A Experience : 0 - 4 Years Skills : Fresher, Java, Android, IOS Developer, Javascript, JQuery, CSS, HTML, PHP Candidate Profile: Candidate should have:1. Strong programming skills2. Excellent problem-solving skills3. Excellent communication skills4. Good to have knowledge in Javascript/Jquery/CSS/HTML/PHP etc. Contact : Mr Vasanthhidden_mobile
Artificial Intelligence Intern	QpiAI	0 to 4 Yrs	Python , Deep Learning , openCV , NLTK , Transformers , Linux , AWS , Azure , GCP , Kubernetes , TensorFlow , PyTorch , torchvision , SpaCy , Large Language Models LLMs , RetrievalAugmented Generation RAG , Generative AI GenAI , AutoML , Neural Architecture Search , Model Optimization , MERN/MEAN stack , Dockers , Version Control Systems , Workflow Orchestration , CI/CD pipeline	Bangalore	The Artificial Intelligence team at QpiAI builds cutting edge products & solutions for our customers most challenging problems in AI across a variety of industry verticals and domains. The team supports enterprise customers from a variety of industries and strives to deliver exceptional innovative solutions, consistently pushing the boundaries of what is possible with AI. Some of the key areas where our team is actively working to build novel capabilities include Computer Vision, Transformers and Generative AI, LLMs, Neural Architecture Search, AutoML, Explainable AI and Continual Learning. Our team is looking for driven individuals who can work alongside our product team for various functions ranging from software testing, functional testing, solution/PoC development, documentation, and relevant areas critical to build successful products in AI & Quantum ML space. Some key traits that our colleagues share. Curiosity First Principles thinking Belief in continuous and sustained self-improvement Passion to blaze a trail and innovate in the emerging areas of AI Key requirements: Proficiency with Python and Deep Learning frameworks: TensorFlow, PyTorch, torchvision, openCV, NLTK, SpaCy etc. Proficiency in using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG) and Generative AI (GenAI). Solid understanding in building Deep Learning models across domains and data modalities - image, text, audio and video. Strong theoretical knowledge of Advanced Deep Learning - Transformers, Generative AI, AutoML, Neural Architecture Search and Model Optimization. Prototyping novel AI capabilities - leading to creation of intellectual property and published paper acceptance at prestigious international conferences. Recent Graduates of Bachelor/Masters degree in engineering, Computer Science, or Electronics Engineering from IITs/NITs. Excellent communication skills. Good to have: Understanding of MERN/MEAN stack. Understanding of Linux, AWS/Azure/GCP ecosystem, Dockers, and Kubernetes. Understanding of Version Control Systems, Workflow Orchestration, CI/CD pipeline,
Jr Data Scientist	DIRAA HR SERVICES Hiring For DIRAA HR SERVICES	0 to 4 Yrs	tableau , mongo db , matplotlib , machine learning , statistical analysis , power bi , sql , python	Bangalore	A Data Scientist is a professional who collects large amounts of data using analytical, statistical, and programmable skills. It is their responsibility to use data to develop solutions tailored to meet the organization's unique needs. Organizations are increasingly using more and more data in their everyday operations. A data scientist interprets the raw data and extracts valuable meaning out of it. They then use this information to find patterns and develop solutions that an organization needs to grow and compete. Data scientist roles and responsibilities include: Data mining or extracting usable data from valuable data sources Using machine learning tools to select features, create and optimize classifiers Carrying out the preprocessing of structured and unstructured data Enhancing data collection procedures to include all relevant information for developing analytic systems Processing, cleansing, and validating the integrity of data to be used for analysis Analyzing large amounts of information to find patterns and solutions Developing prediction systems and machine learning algorithms Presenting results in a clear manner Propose solutions and strategies to tackle business challenges Collaborate with Business and IT teams Contact Person : Rakesh HR Contact Number : hidden_mobile Candidates Looking For Salem, karur , Namakkal , Erode , Pollachi , Dharamapuri , Krishnagiri , Dharapuram
